<b>Abstract</b>	<b>iii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Spin-charge Coupled Systems . . . . .	1
1.2 Geometrical Frustration . . . . .	2
1.3 Spin Scalar Chirality and Anomalous Transport Phenomena . . . . .	3
1.3.1 Scalar Chirality and Berry Phase . . . . .	3
1.3.2 Topological Hall Effect . . . . .	4
1.3.3 Thermal (Magnon) Hall Effect . . . . .	10
1.4 Purpose of This Thesis . . . . .	12
1.5 Organization of This Thesis . . . . .	13
<b>2 Model and Method</b>	<b>15</b>
2.1 Ferromagnetic Kondo Lattice Model . . . . .	15
2.2 Variational Calculation . . . . .	16
2.3 Perturbation Theory . . . . .	18
2.4 Simulated Annealing . . . . .	20
2.5 Linear Spin Wave Analysis . . . . .	21
<b>3 Ground-state Phase Diagram on a Triangular Lattice</b>	<b>25</b>
3.1 Numerical Comparison of Grand Potential . . . . .	25
3.2 Perturbation Calculation of Free Energy . . . . .	27
3.3 Ground-state Phase Diagram: Scalar Spin Chiral Order at 1/4 filling . . .	30
3.4 Hall Conductivity . . . . .	33
3.5 Related Theoretical Studies . . . . .	35
<b>4 Stability of Scalar Chiral Order</b>	<b>37</b>
4.1 Effect of Next Nearest-neighbor Hopping . . . . .	37
4.2 Effect of Lattice Deformation: From Triangular to Kagome . . . . .	39

<b>5</b>	<b>Stabilization Mechanism of Scalar Chiral Order</b>	<b>44</b>
5.1	Hidden Multiple-spin Interactions in the Fourth-order Perturbation . . . . .	44
5.2	Origin of Positive Biquadratic Interaction: Generalized Kohn Anomaly . . . . .	46
5.3	Divergent Singularity of Positive Biquadratic Interaction . . . . .	49
<b>6</b>	<b>Effect of Superexchange Antiferromagnetic Interaction</b>	<b>54</b>
6.1	Lightly-doped Region: Noncoplanar Three-sublattice Order . . . . .	55
6.1.1	Phase Diagram by Variational Calculation . . . . .	55
6.1.2	Phase Separation . . . . .	56
6.1.3	Analysis of the Density of States . . . . .	58
6.2	Spontaneous Kagome Network State . . . . .	60
6.2.1	Phase Diagram by Variational Calculation . . . . .	60
6.2.2	Dirac Electrons in Kagome Network Phase . . . . .	62
6.2.3	Stability of Kagome Network Phase: Simulated Annealing . . . . .	63
6.2.4	Effect of Off-site Coulomb Repulsion . . . . .	65
6.2.5	Effect of External Magnetic Field . . . . .	67
<b>7</b>	<b>Effect of Quantum Spin Fluctuation on Scalar Chiral Ordering</b>	<b>68</b>
7.1	Magnon Dispersion in Scalar Chiral Phase . . . . .	68
7.2	Reduction of Ordered Moment . . . . .	69
<b>8</b>	<b>Magnon Hall Effect in the Kondo Lattice Model</b>	<b>74</b>
8.1	Transverse Magnon Current Induced by Magnon Current in the Kondo Lattice Model . . . . .	74
8.1.1	General Formulation of Magnon Conductivity Tensor . . . . .	75
8.1.2	Magnon Hall Coefficient in Spin Scalar Chiral Phase in the Kondo Lattice Model . . . . .	77
8.1.3	Sign Change of Magnon Hall Coefficient for the Hund's-rule Coupling . . . . .	81
8.2	Magnon Current Induced by Electric Field in the Kondo Lattice Model . . . . .	83
8.3	Discussion . . . . .	85
<b>9</b>	<b>Summary</b>	<b>87</b>
<b>A</b>	<b>Perturbation Calculation</b>	<b>90</b>
<b>B</b>	<b>Formulation of Hall Conductivity</b>	<b>96</b>
<b>C</b>	<b>Ground-State Phase Diagrams and Effective Interactions on Other Frustrated Lattices</b>	<b>98</b>
C.1	Face-centered-cubic Lattice . . . . .	98
C.2	Checkerboard Lattice . . . . .	101
C.3	Pyrochlore Lattice . . . . .	105

<b>D Spin Wave Analysis for Coplanar and Collinear Orders in the Kondo Lattice Model</b>	<b>110</b>
D.1 Coplanar $120^\circ$ Néel Order on a Triangular Lattice . . . . .	110
D.2 Collinear Néel Order on a Square Lattice . . . . .	111
<b>E Formulation of Magnon Conductivity Tensor</b>	<b>116</b>
<b>F Magnon Hall Effect in Localized Spin Systems</b>	<b>118</b>
F.1 Katsura-Nagaosa-Lee Model . . . . .	118
F.2 Kagome Antiferromagnet in Applied Magnetic Field . . . . .	122
<b>G Formulation of Magnon Current Induced by Electric Field</b>	<b>127</b>
