<b>Acknowledgments</b>	<b>i</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Multiple Degrees of Freedom in Electrons in Solids . . . . .	1
1.2 Spin-Charge Coupling . . . . .	4
1.2.1 Effective Magnetic Interactions via Spin-Charge Coupling . . . . .	5
1.2.2 Magnetoresistance . . . . .	6
1.2.3 Topological Hall Effect . . . . .	7
1.2.4 Kondo Coupling and Heavy-Fermion Behavior . . . . .	9
1.3 Spin-Charge-Orbital Coupling . . . . .	11
1.3.1 Spin-Orbit Coupling . . . . .	11
1.3.2 Antisymmetric Spin-Orbit Coupling . . . . .	12
1.3.3 Spin Hall Effect . . . . .	12
1.3.4 Magnetoelectric Effect . . . . .	14
1.4 Motivation of This Thesis . . . . .	15
1.5 Organization of This Thesis . . . . .	16
<b>2 Spontaneous Toroidal Ordering in Metals</b>	<b>19</b>
2.1 Introduction . . . . .	19
2.1.1 Microscopic Definition of Toroidal Moment . . . . .	21
2.1.2 Macroscopic Viewpoint . . . . .	22
2.2 Model . . . . .	23
2.2.1 Lattice Structures with Local Parity Breaking . . . . .	23
2.2.2 Effective Single-Band Model . . . . .	24
2.3 Electronic Structure . . . . .	27
2.4 Magnetotransport . . . . .	29
2.5 Magnetoelectric Effect . . . . .	31
2.5.1 Longitudinal Toroidal Magnetization caused by Electric Current . . . . .	32
2.5.2 Transverse Magnetization caused by Electric Current . . . . .	32
2.5.3 Summary of Magnetoelectric Effects . . . . .	33
2.6 Intrinsic Hall Effect . . . . .	34
2.7 Stability of Toroidal Order . . . . .	35
2.7.1 Ground State . . . . .	36
2.7.2 Finite Temperature . . . . .	36
2.8 Toroidal Ordering in a Partially Disordered State in UNi <sub>4</sub> B . . . . .	39

2.8.1	Partial Disorder in UNi <sub>4</sub> B . . . . .	39
2.8.2	Extended Periodic Anderson Model . . . . .	41
2.8.3	Ground-State Phase Diagram . . . . .	42
2.9	Summary and Concluding Remarks . . . . .	43
<b>3</b>	<b>Multipole Ordering by Antisymmetric Hybridization</b>	<b>45</b>
3.1	Introduction . . . . .	45
3.2	Generalized Kondo Lattice Model . . . . .	46
3.3	Effect of Antisymmetric Exchange Couplings: Two-Site Problem . . . . .	49
3.4	Multipole Ordered State: Electronic Structure and Magnetoelectric Effect	51
3.5	Phase Diagram . . . . .	54
3.5.1	Variational Calculation . . . . .	54
3.5.2	Simulated Annealing . . . . .	57
3.5.3	Monte Carlo Simulation . . . . .	59
3.6	Summary . . . . .	60
<b>4</b>	<b>Parity Breaking by Spontaneous Electronic Ordering</b>	<b>63</b>
4.1	Introduction . . . . .	63
4.2	Model . . . . .	65
4.3	Symmetry Analysis . . . . .	67
4.4	Paramagnetic State . . . . .	69
4.4.1	Band Structure . . . . .	69
4.4.2	Spin Hall Effect . . . . .	70
4.5	Ordered States with Parity Breaking . . . . .	74
4.5.1	Class #1: CO, $zz$ -SOO . . . . .	74
4.5.2	Class #2: $x/y$ -OO . . . . .	77
4.5.3	Class #3: $xz/yz$ -SOO . . . . .	80
4.5.4	Class #4: $z$ -SO, $z$ -OO . . . . .	81
4.5.5	Class #5: $zx/zy$ -SOO . . . . .	83
4.5.6	Class #6: $x/y$ -SO . . . . .	85
4.5.7	Class #7: $xx/yy/xy/yx$ -SOO . . . . .	86
4.6	Ground State Phase Diagram . . . . .	89
4.6.1	1/4 Filling . . . . .	89
4.6.2	Half Filling . . . . .	93
4.7	Strong Correlation Limit . . . . .	94
4.8	Extension to Three-Orbital Model . . . . .	95
4.8.1	1/3 Filling . . . . .	97
4.8.2	1/6 Filling . . . . .	98
4.9	Summary . . . . .	99
<b>5</b>	<b>Partial Disorder in Frustrated Spin-Charge Coupled Systems</b>	<b>101</b>
5.1	Introduction . . . . .	101
5.2	Model and Method . . . . .	103
5.3	Results by Hartree-Fock Approximation . . . . .	106
5.3.1	Partial Disorder at Commensurate Fillings . . . . .	106

5.3.2	Effect of Ising Coupling . . . . .	110
5.3.3	Effect of Magnetic Field . . . . .	112
5.3.4	Effect of Carrier Doping . . . . .	117
5.4	Results by Dynamical Mean-Field Approximation . . . . .	120
5.5	Summary . . . . .	125
<b>6</b>	<b>Multiple-<math>Q</math> Ordering in Spin-Charge Coupled Systems</b>	<b>127</b>
6.1	Introduction . . . . .	127
6.2	Multiple- $Q$ Magnetic Orders . . . . .	130
6.3	Perturbation Expansion . . . . .	132
6.4	$(d - 2)$ -Dimensional Connections of Fermi Surfaces . . . . .	135
6.5	Flow Diagram . . . . .	138
6.6	Summary . . . . .	138
<b>7</b>	<b>3D Dirac Electrons on a Cubic Lattice with Noncoplanar Order</b>	<b>139</b>
7.1	Introduction . . . . .	139
7.2	Noncoplanar Triple- $Q$ Order and 3D Dirac Electrons . . . . .	141
7.3	Topological Insulator by Opening a Gap . . . . .	143
7.4	Stability of Triple- $Q$ Dirac Phase . . . . .	147
7.4.1	Kondo Lattice Model . . . . .	148
7.4.2	Periodic Anderson Model . . . . .	152
7.5	Surface State in Triple- $Q$ Dirac Phase . . . . .	155
7.6	Summary and Concluding Remarks . . . . .	156
<b>8</b>	<b>Charge Order with Noncoplanar Magnetic Order</b>	<b>159</b>
8.1	Introduction . . . . .	159
8.2	Ground-State Phase Diagram . . . . .	162
8.3	Emergent Magnetic Frustration . . . . .	165
8.4	Electronic Structure . . . . .	166
8.5	Summary . . . . .	168
<b>9</b>	<b>Summary</b>	<b>169</b>
