<b>Abstract</b>	<b>ii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Background and motivation . . . . .	1
1.2 Spin glass . . . . .	2
1.2.1 Classical spin glass models . . . . .	2
1.2.2 Quantum spin glass models . . . . .	4
1.3 Chaotic and spin liquid states . . . . .	5
1.3.1 Sachdev-Ye-Kitaev model . . . . .	5
1.3.2 Random quantum spin liquids . . . . .	6
1.4 Related work on the model in this thesis . . . . .	7
1.5 Purpose and organization of this thesis . . . . .	7
<b>2 Model and method</b>	<b>9</b>
<b>3 Ground state properties</b>	<b>12</b>
3.1 Setup and observables . . . . .	12
3.2 Spin liquid and spin glass behavior in the isotropic case . . . . .	14
3.3 Spin liquid under more restricted conditions in the XY limit . . . . .	17
3.4 Absence of spin liquid in the Ising limit . . . . .	21
3.5 Phase diagram . . . . .	21
3.6 Effects of a magnetic field . . . . .	26
<b>4 Spectral statistics</b>	<b>30</b>
4.1 Setup and observables . . . . .	30
4.2 Gaussian ensembles in the isotropic case . . . . .	32
4.3 Lack of level correlation in the Ising limit . . . . .	35
4.4 Spectral classification . . . . .	38
<b>5 Summary</b>	<b>44</b>

<b>A</b>	<b>Ground state properties for the <math>p = 2</math> case</b>	<b>48</b>
<b>B</b>	<b>Analysis of the spectral function</b>	<b>52</b>
<b>C</b>	<b>Analytical derivation of the density of states in the thermodynamic limit</b>	<b>57</b>
<b>D</b>	<b>Analysis of the density of states by fitting the theoretical function</b>	<b>59</b>
<b>E</b>	<b>Supplementary analysis of level spacing ratio distributions</b>	<b>62</b>
